CompuPay®
Innovation Pays

Penalty-Free Tax Service

CompuPay provides multi-jurisdiction tax filing, payment and compliance as part of our basic service. Our tax service is guaranteed penalty free* and CompuPay will take care of any IRS notices and will pay any penalties that may arise.

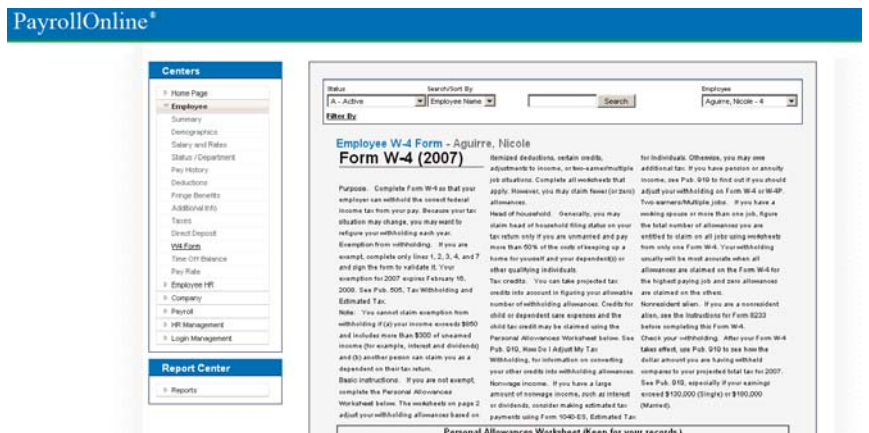

Standard tax reports in CompuPay PayrollOnline include quarterly tax returns, employer W-2s and 1099s as well as labor and industry reports.

Employee Self Service

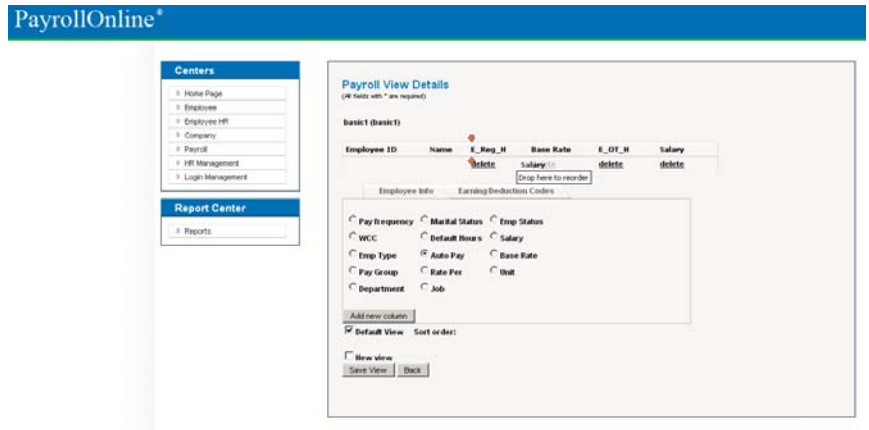

The employee self service feature allows employees online access to pay stubs and W-2s, company documents and forms and available vacation and sick time. Employees also have the ability to update their W-4s through employee self service.

This is a great time saver as it reduces time spent reprinting W-2s, routing forms and checking paid time off balances.

Custom Pay Entry Screen

With CompuPay PayrollOnline, the payroll entry process has been streamlined through a customizable payroll view screen. Users can drag and drop columns to create custom entry screens that match your information and speed up time and earnings data entry.

*Penalty-free tax service is guaranteed as long as the information provided to CompuPay is accurate, on time and your tax account is fully funded.
